

Personalized Filter Replacement Schedule

This report outlines the recommended replacement schedule for your PureDrop water filters, ensuring you continue to enjoy clean, safe, and great-tasting water. Please refer to your specific product model for precise guidelines.

Your Current PureDrop Filters:

- **PureDrop Advanced Under-Sink Filtration System:**
 - **Filter Lifespan:** Generally lasts 6-12 months, or approximately 1,500 gallons (5,678 liters), depending on your incoming water quality and usage.
 - **Recommendation:** We recommend replacing filters at least once a year for optimal performance.
 - **Next Recommended Replacement:** [Date - e.g., 6 months from purchase/installation date or based on typical usage]
- **PureDrop Whole-Home Water Filtration System:**
 - **Main Filtration Media Lifespan:** Typically lasts 3-5 years, depending on water quality and usage.
 - **Sediment Pre-Filter Lifespan:** May need replacement every 6-12 months.
 - **Recommendation:** Check your sediment pre-filter every 6 months.
 - **Next Recommended Main Media Replacement:** [Date - e.g., 3-5 years from installation date]
 - **Next Recommended Pre-Filter Replacement:** [Date - e.g., 6-12 months from installation date]
- **PureDrop Countertop Pitcher Filter:**
 - **Filter Cartridge Lifespan:** Each filter cartridge typically lasts for 2 months or filters approximately 40 gallons (150 liters) of water, whichever comes first.
 - **Recommendation:** Replace every 2 months or when the electronic indicator light prompts you.
 - **Next Recommended Replacement:** [Date - e.g., 2 months from last replacement]

Important Notes:

- **Signs of Clogging:** If you notice a significant drop in water flow rate or a return of unpleasant tastes or odors, it's time to replace your filter even if it's before the recommended interval.
- **Where to Buy Replacements:** You can easily purchase authentic PureDrop replacement filters directly from our official website , from authorized PureDrop retailers.
